

MEMORANDUM No. 2019-063

DATE: October 9, 2019

SUBJECT: USE OF FORCE REVIEW 3RD QUARTER 2019

Background

It is the policy of this department that officers hold the highest regard for the sanctity of human life and liberty of all persons and that no unnecessary or unreasonable force shall be used. Use of force incidents, at a minimum, are reviewed by the involved officer’s chain of command, and by two separate use of force review boards; an internal board staffed by department employees and an external board comprised of community members appointed by the Mayor. In each incident, the officer’s actions are scrutinized using case law, department policy, and policing best practices.

July, August, September 2019 Quarter Review

During the third quarter of calendar year 2019, Chandler Police Officers logged 2049 arrests averaging twenty two (22) arrests per day. Officers used force to affect the arrest or lawfully detain a person(s) under reasonable suspicion or probable cause in twenty-two (22) of the 2,049 incidents. Each application of force used by the officer was evaluated independently to determine if the officer’s actions are within policy. Of the twenty-four (24) use of force incidents, a total of thirty-eight (38) applications of force were documented.

Force Used	Applications	Additional Details
Low Level Force	18	Take downs, pressure points, Hard hands
Intermediate Force	20	Bilateral vascular restraint, fist strikes, Knee strikes, Kicks, 40 mm Sage rounds, CEW
Total	38

1	Native American	Female	44	44	4.5%

(22 total subjects in the use of force incidents)

Injuries

In the third quarter of 2019, six (6) officers were injured during use of force incidents. The injuries sustained by officers were mostly minor in nature, generally consisting of sprains, abrasions, cuts, or bruising. The majority of the officers' injuries appeared to stem from body-to-body contact, takedown techniques, and struggling to handcuff suspects on hard surfaces or from direct assaults on the officers themselves.

Eighteen (18) suspects were injured or complained of injury during the use of force incidents. The majority of these injuries were minor in nature, consisting of lacerations, abrasions, contusions, complaints of pain, and CEW puncture wounds.
