## **Background**

The Chandler Police Department recognizes the current Arizona statutory law dictating that “no unnecessary or unreasonable force shall be used in making an arrest, and the person arrested shall not be subjected to any greater restraint than necessary for his detention.”<sup>1</sup> The Chandler Police Department stipulates officers must adhere to their training unless the situation justifies a deviation from that training.<sup>2</sup>

The Chandler Police Department began to utilize the Use of Force Review Board in 2008 to ensure the proper documentation of all applications of force, evaluate those applications for adherence to established policy, and determine any additional training needs.<sup>3</sup> The board meets monthly to evaluate the prior month’s incidents, and quarterly reviews are prepared to share information and findings with the Citizen Review Panel.

This analysis contains use of force statistics for the second quarter of 2023 to identify prevalent trends or deficiencies per the current CALEA standard.<sup>4</sup> In addition to an internal comparative analysis, this report will illustrate training issues that emerged throughout the quarter, as well as the number and general nature of injuries sustained by personnel and suspects.

### **2023 Second Quarter Review**

The Chandler Police Department logged 2191 arrests during the second quarter of 2023, yielding a total of twenty-three (23) incidents resulting in a use of force by Chandler Police Officers to effect an arrest or detain a subject under reasonable suspicion or probable cause.

All reportable incidents were reviewed by the Use of Force Review Board. This board meets monthly to determine if the applications of force are justified in accordance with the policies of the Chandler Police Department.

The following tables document the twenty-three (23) incidents reviewed by the board for the months of April, May, and June of 2023. It includes the types of force used and dispositions. In some incidents there were multiple applications of force used by various officers. For this reason, there were forty-eight (48) distinct applications of force. This report will deliver the summaries of the twenty-three (23) reviewed incidents.
